

NEWS APRIL 23, 2018

Fellow Golfers,

26 tons of sand later, the greens are plugged and sanded. A GREAT BIG THANKYOU to all you guys who came out yesterday and used your personal time to work at the club. All the extra man power and atv's donated was a great help. Your time and labor was greatly appreciated. Due to everyone that showed up, the whole process was done a lot earlier than years before. Thank You! The course will remain closed for the next few days until the sand dries and we can get it brushed in, thanks for your cooperation.

That was the good news. Now we have a bit of bad news...the pump motor that runs all our irrigation system has laid down and died. We will be in contact with Williams Drilling Company about purchasing and installing a new one asap. The bad news is that we did not budget for such a great expenditure. This will be a costly matter, but one that is absolutely necessary for our course to survive. If everyone of us who uses the course could donate some extra funds it would be greatly appreciated. If you can help the course out in this way, please contact one of the board members as soon as possible.

Thanks again for everyone who is involved with Belleville Country Club on the course and in the Club House.

BCC Board of Directors
